With Tala. She confirms this is correct. Reporter may be asking about adding PFAS to TRI.

**Incoming:**

Do you know if this TSCA update includes any new PFAS, which were promised in the PFAS Action Plan announced recently?

**Response:** The TSCA inventory includes any PFAS in commerce, for a non-exempt use, in the past ten years. The TSCA inventory is independent of the goals in the PFAS action plan, but does provide EPA and the public up to date information about what PFAS are currently in commerce in the U.S. To view the complete inventory and learn how to search it, visit:
